OSCARS
Open Science Clusters' Action for Research & Society

About

OSCARS is a four-year Horizon Europe project that will foster the uptake of Open Science in Europe by consolidating the achievements of world-class European Research Infrastructures (RIs) in the ESFRI roadmap and beyond into lasting interdisciplinary FAIR data services and working practices.

Objectives

- Setup and implementation of Clusters' Open Science Competence Centres (CLOCCs)

- Identify and provide Composable Open Data and Analysis Services (CODAS) via VREs)

- Support and structure an EOSC ecosystem in which all OSCARS-funded Open Science projects and services will contribute to a data space for science, research and innovation

OSCARS Open Calls for Open Science Projects and Services

OSCARS has launched two Open Calls (total worth ~16 million EUR) to support research communities from all scientific domains to take up Open Science and foster the involvement of scientists in EOSC. The goal is to select third-parties for the development of new, innovative Open Science projects or services, that together will drive the uptake of FAIR-data-intensive research across the European Research Area.

Science Clusters

ENVRI	LS RI	ESCAPE	PaNOSC	SSHOC
Environmental Sciences	Life Sciences	Astronomy, Particle and Nuclear Physics	Photon and Neutron Science	Social Sciences and Humanities

1st OSCARS Open Call in numbers

Proposals
- **264** Proposals received
- **610** Organisations
- **42** Countries

Funded projects
- **58** Funded projects
- **173** Organisations
- **28** Countries
- **10** Organisation types

Scientific domains
- **38** from domains in the 5 SCs
- **17** cross- culster
- **3** beyond the domains of the 5 SCs

- University: 17
- RI: 10
- RTO: 15
- Non profit: 3
- SME: 3
- International org.: 3
- Pan-European org.: 1
- Project, network, initiative: 1
- Large enterprise: 1
- Other: 3

2nd OSCARS Open Call in numbers

Proposals
- **764** Proposals received
- **1884** Organisations
- **67** Countries

Funded projects
- **12** Funded projects
- **31** Organisations
- **11** Countries
- **5** Organisation types

Scientific domains
- **10** from domains in the 5 SCs
- **2** cross- culster

- University: 18
- RI: 4
- RTO: 5
- Non profit: 3
- SME: 3
- Other: 1
