

# OSCAR

Open Science Clusters' Action  
for Research & Society

## About

OSCAR is a four-year Horizon Europe project that will foster the uptake of Open Science in Europe by consolidating the achievements of world-class European Research Infrastructures (RIs) in the ESFRI roadmap and beyond into lasting interdisciplinary FAIR data services and working practices.

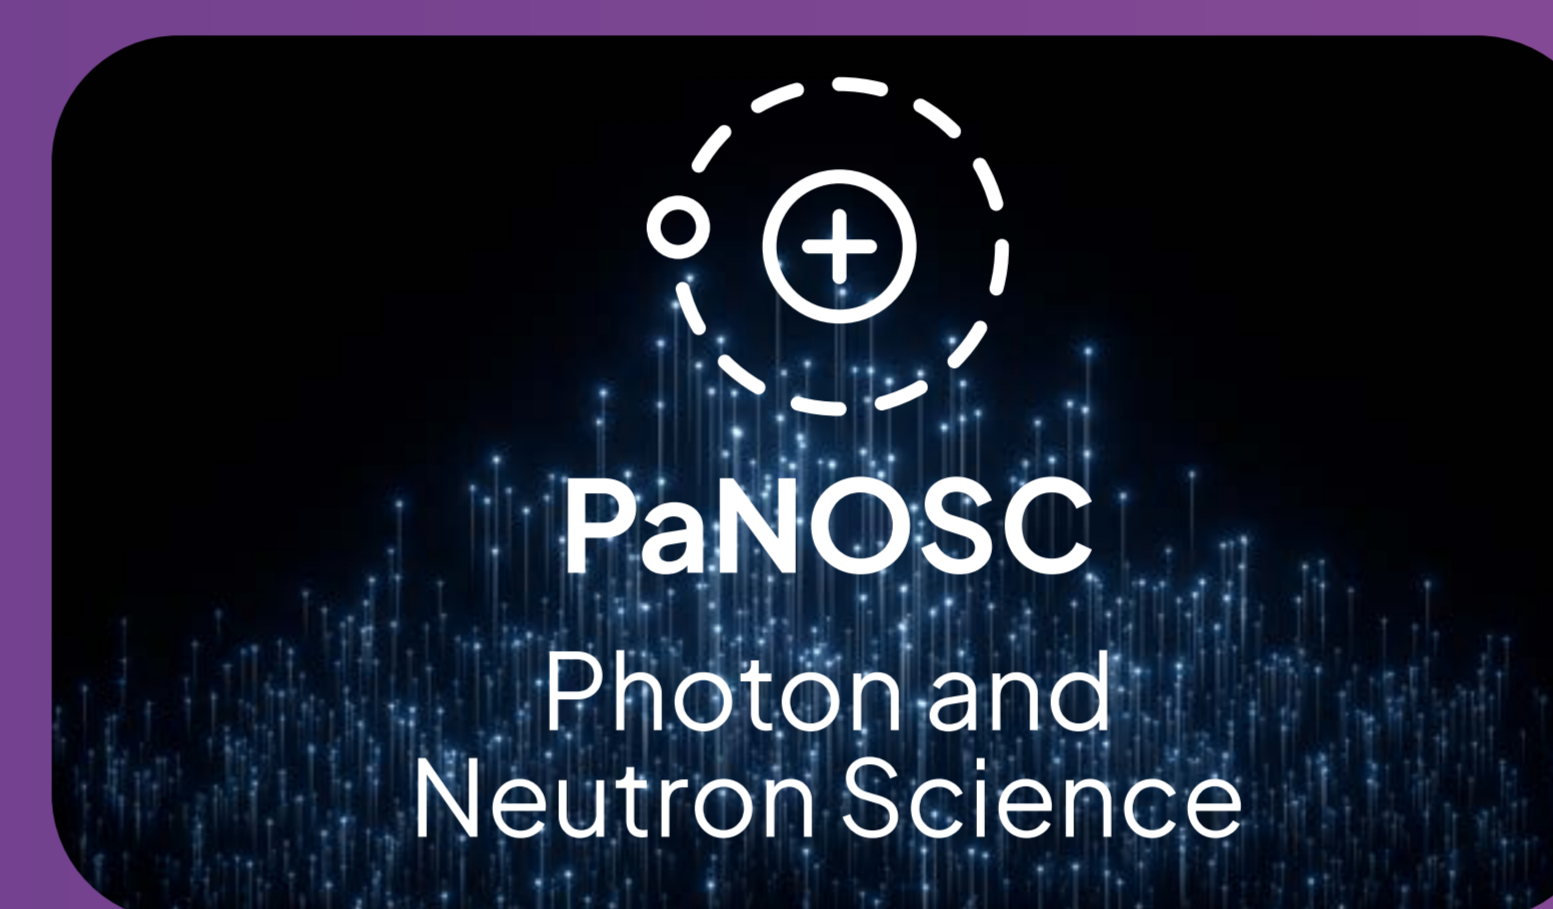

## Objectives

- Setup and implementation of Clusters' Open Science Competence Centres (CLOCCs)
- Identify and provide Composable Open Data and Analysis Services (CODAS) via VREs)
- Support and structure an EOSC ecosystem in which all OSCAR-funded Open Science projects and services will contribute to a data space for science, research and innovation

## OSCAR Open Calls for Open Science Projects and Services

Through two Open Calls, OSCAR supported 70 projects to advance data sharing and the implementation of the FAIR principles across diverse scientific communities and disciplines. Funded projects address Open Science challenges spanning datasets, repository workflows, metadata annotation pipelines for cross-cluster interoperability, FAIR data analysis software, tools and platforms, AI-assisted tools for data analysis and FAIR data validation, reusable software services integrated with EOSC. Together they have been driving the uptake of FAIR-data-intensive research across the European Research Area.

## Science Clusters

### 1st OSCAR Open Call

#### Proposals

**264** Proposals received

**610** Organisations

**42** Countries

#### Funded projects

**58** Funded projects

**173** Organisations

**28** Countries

**10** Organisation types

#### Scientific domains

**38** from domains of the 5 SCs

**17** cross-cluster

**3** beyond the domains of the 5 SCs

- University: 17
- RI: 10
- RTO: 15
- Non profit: 3
- SME: 3
- International org.: 3
- Pan-European org.: 1
- Project, network, initiative: 1
- Large enterprise: 1
- Other: 3

### 2nd OSCAR Open Call

#### Proposals

**746** Proposals received

**1884** Organisations

**67** Countries

#### Funded projects

**12** Funded projects

**31** Organisations

**11** Countries

**5** Organisation types

#### Scientific domains

**10** from domains of the 5 SCs

**1** cross-cluster

**1** beyond the domains of the 5 SCs

- University: 18
- RI: 4
- RTO: 5
- SME: 3
- Other: 1
